Personal Skills: Teamwork, Problem Solving, Communication, Critical Thinking, Attention to detail.

Technical Skills: Planning, Developing, Testing, Deploying, Debugging, Designing Tools, Databases, Documenting.

Version Control: Git, GitHub, GitLab.

Design Patterns: Microservices, Monoliths, MVC, MVVM.

AI Tools: Cursor, Copilot, Gemini-CLI, Figma AI.

Projects

UMPSA Community Platform • ↗

UMPSA Community Platform is my Final Year Project, a MERN-based web app that connects students, clubs, and admins in one hub, all in a responsive and engaging community space.

onSoftware Website • ↗

A modern & responsive company profile landing page. Built with Next.js & Tailwind.css technologies. Developed reusable components animated with framer-motion.

EasyOrder Website

A modern and user-friendly food ordering website built with Laravel and Bootstrap. It offers a responsive design and functionality for browsing menus, placing orders, and managing transactions efficiently.

Carepulse Website • ↗

A healthcare platform that streamlines patient registration, appointment scheduling, medical records, and the admin dashboard.

Certificates

Back End Development and APIs from FreeCodeCamp
July 2025 • ↗

Emotional Intelligence and Leadership from Edraak
August 2025 • ↗

Full-Stack Development 101 from Simplilearn
July 2025 • ↗

System Design and Architecture from Manara
July 2025 • ↗

Advanced Prompt Engineering with ChatGPT from upGrad KnowledgeHut
August 2025 • ↗

Volunteering

Programming Internship at 42kl, Kula Lumpur, Malaysia
August 2024 - October 2024

Education

Bachelor of Computer Science Software Engineering (with honours) at University Malaysia Pahang Al-Sultan Abdullah
October 2022 - Present
