

IBRAHIM BAKOUR

SOFTWARE ENGINEER

Riyadh, Saudi Arabia | ibakour37@gmail.com | +966 50 337-4194
[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

A Computer Science graduate specializing in Software Engineering. Throughout my studies and practical experience, I’ve bridged theoretical computer science with hands-on systems architecture, backend integrations, and workflow automation.

TOP PROJECTS

UMPSA Community Platform

A full-stack MERN-based web app that connects students, clubs, and admins in one hub, all in a responsive and engaging community space.

Preacher Monitoring Management System

A Flutter-based mobile application for managing preachers, activities, and payments for religious organizations.

EasyOrder Website

A Laravel and Bootstrap modern user-friendly food ordering website. It offers a responsive design and functionality for browsing menus, placing orders, and managing transactions efficiently.

Shipping and Delivery System

Developed a comprehensive Shipping and Delivery System using Java and an OOP approach to streamline logistics and delivery operations across multiple product categories.

WORK EXPERIENCE

AI Automation Engineer at [Zamn | زامن](#), Riyadh, Saudi Arabia

February 2026 - August 2026

Engineered scalable n8n workflows and API integrations to automate CRM syncs, subscription billing, and multi-channel notifications while building a RAG-powered AI support agent and Git-backed disaster recovery systems.

CERTIFICATES

Back End Development and APIs from FreeCodeCamp · Link	July 2025
Full-Stack Development 101 from Simplilearn · Link	July 2025
System Design and Architecture from Manara · Link	July 2025
Databases from Manara · Link	July 2025
Fundamentals of Communication from upGrad KnowledgeHut · Link	August 2025
Advanced Prompt Engineering with ChatGPT from upGrad KnowledgeHut · Link	August 2025
Emotional Intelligence and Leadership from Edraak · Link	August 2025
Emotional Intelligence and One’s Self from Edraak · Link	December 2025
Integrations: APIs & Connected Workflows from n8n · Link	July 2026
Essentials: Your First Workflows from n8n · Link	August 2026
In Practice: AI, Testing & Best Practices from n8n · Link	August 2026
n8n Quickstart from n8n · Link	August 2026

SKILLS

Technologies: MERN Stack, Laravel Framework, Flutter, Postman, React Native, Version Control.
Personal Skills: Teamwork, Problem Solving, Communication, Critical Thinking, Attention to detail.
Technical Skills: Planning, Developing, Testing, Deploying, Debugging, Databases, Documenting.
AI Tools: Claude, Cursor, Copilot, Gemini-CLI, Figma AI.

VOLUNTEERING

Programming Internship at 42kl, Kula Lumpur, Malaysia

August 2024 - October 2024

EDUCATION

**Bachelor of Computer Science Software Engineering (with honours) at
University Malaysia Pahang Al-Sultan Abdullah, Malaysia**

October 2022 - August 2026
